Amendments to the Claims:

This listing of claims will replace all prior versions and listings of the claims.

Listing of Claims:

1. (Currently amended) A method comprising steps of:
 - (a) directing current to a motor; and
 - (b) modulating the current in reference to a predetermined profile that reduces air bearing instability, and in reference to an occurrence of interference associated with an undesired air-bearing stability in an interface between a head and a surface.
2. (Canceled)
3. (Previously presented) The method of claim 1, wherein the motor is associated with a spindle and the surface is a disc, wherein the disc and motor are included in a storage device.
4. (Currently amended) The method of claim ~~[[2]]~~ 1, wherein the profile represents a relationship between time and quantity of current, and wherein the modulating step ~~(b)(i)~~ further comprises the steps of:
 - ~~(b)(i)~~(1) monitoring a lapse of time;
 - ~~(b)(i)~~(2) referencing the representation of a quantity of current in the profile, from the lapse of time; and
